Regulatory Information

FCC Notices

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the Federal Communications Commission (FCC) Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee

that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio or television technician for help.

This device complies with Part 15 (A) of the FCC Rules. Operation is subject to the following two conditions:

- 1) this device may not cause harmful interference and
- 2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS DEVICE. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE DEVICE.

CE Notice

This device complies with **EMC Directive 2004/108/EC** issued by the Commission of the European Community.

WEEE Notice

The **WEEE** mark applies only to countries within the European Union (EU) and Norway.

This appliance is labeled in accordance with

European Directive 2002/96/EC concerning **waste electrical and electronic equipment (WEEE)**. The

Directive determines the framework for the return

and recycling of used appliances as applicable

throughout the European Union. This label is applied

to various products to indicate that the product is not

to be thrown away, but rather reclaimed upon end of

life per this Directive.

Basic Driver Installation

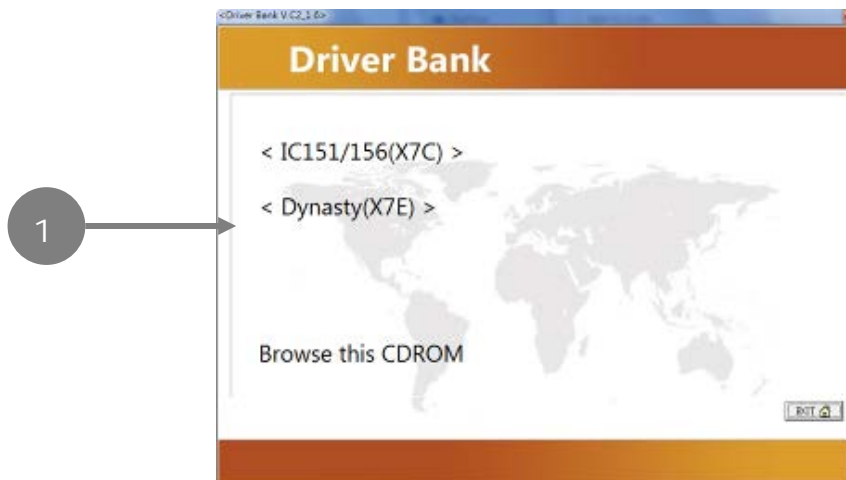

1.1. Before the installation

1. Connect an external USB CDROM to the USB power and insert the driver CD and turn on the device. The program auto runs and displays the **DRIVER BANK** screen.
2. Follow the on-screen instructions.

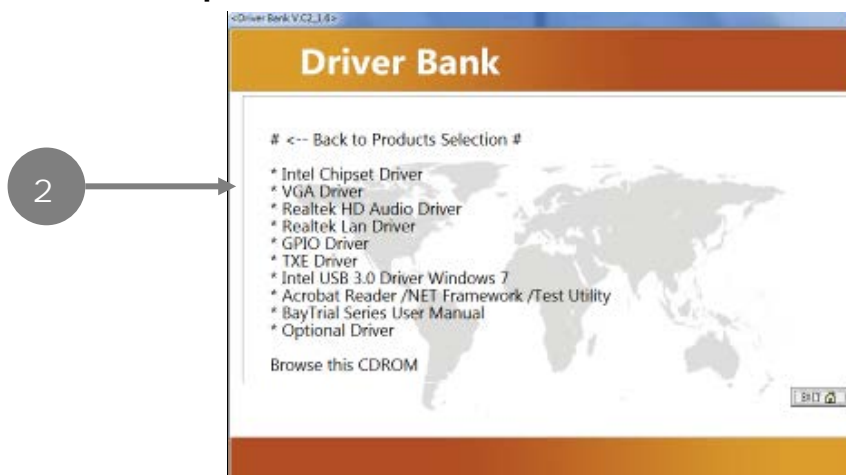

Before install OS, enter BIOS setup menu and change setting as following:

1.2. Chipset Software Installation

1. On the main screen, click “**Product Series**”.

2. Click **INTEL Chipset Driver**.

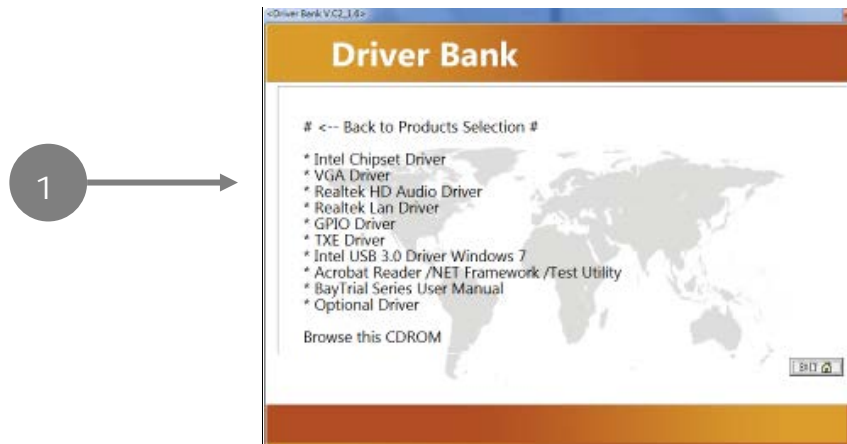

6. Click **Finish**.

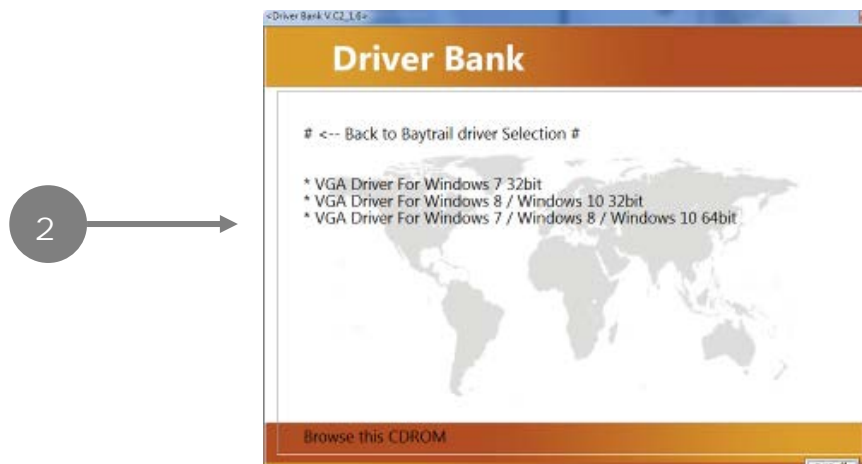

7. Please Restart.

1.3. VGA Driver Installation

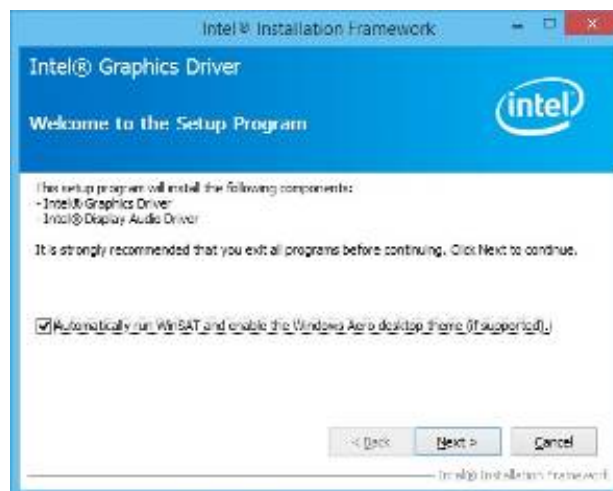

1. Click **VGA Driver**.

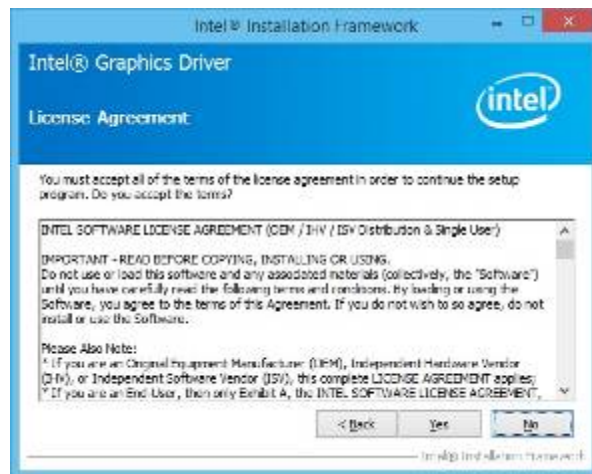

2. Click **VGA Driver for WIN7/WIN8/WIN10**.

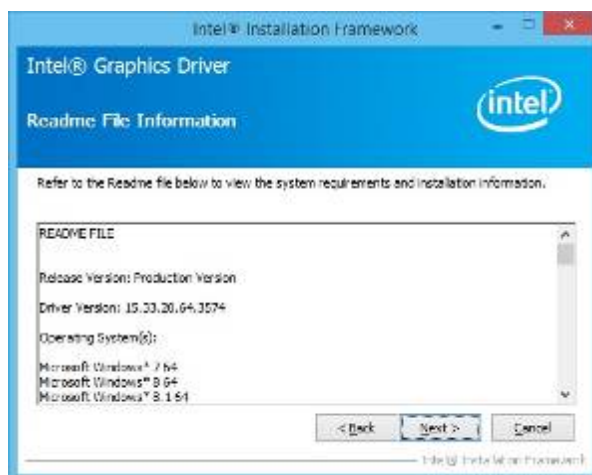

3. Click **Next**.

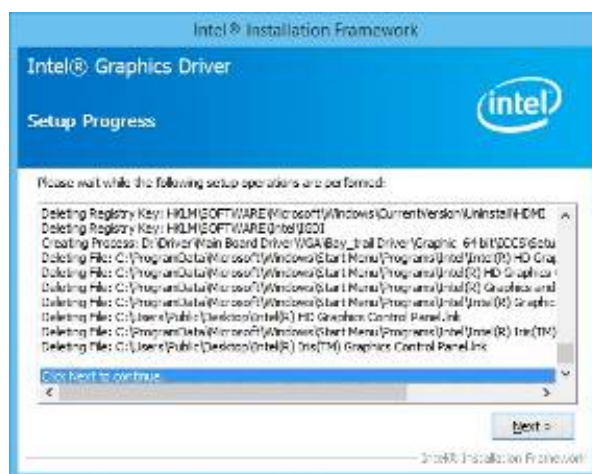

4. Read the License Agreement carefully and click **Yes**.

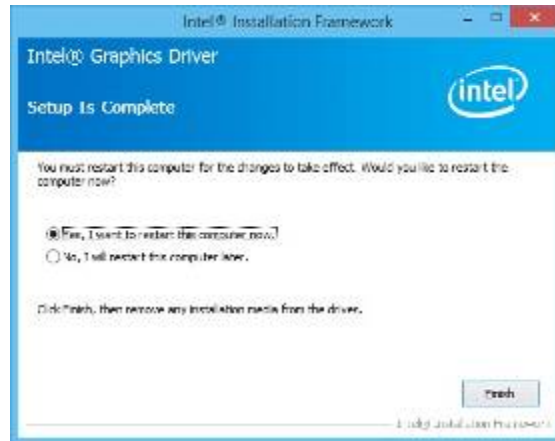

5. Click **Next**.

6. Click **Next**.

7. Select restart your computer right now or later, and then lick **Finish**.

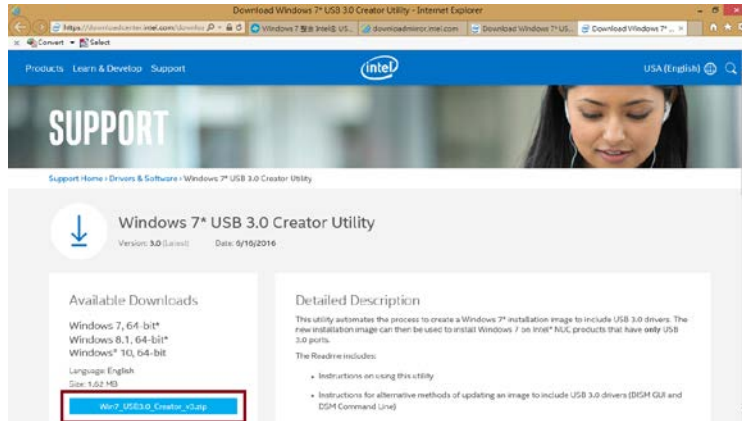

1.4. Windows 7 USB 3.0 Creator Manual

1. Download Windows 7 USB 3.0 Creator

Intel Website:

<https://downloadcenter.intel.com/download/25476/Windows-7-USB-3-0-Creator-Utility>

EBN FTP: ftp://ftp.ebn.com.tw/Win7_USB3.0_Creator/

2. Unzip Win7_USB3.0_Creator_V3.zip.

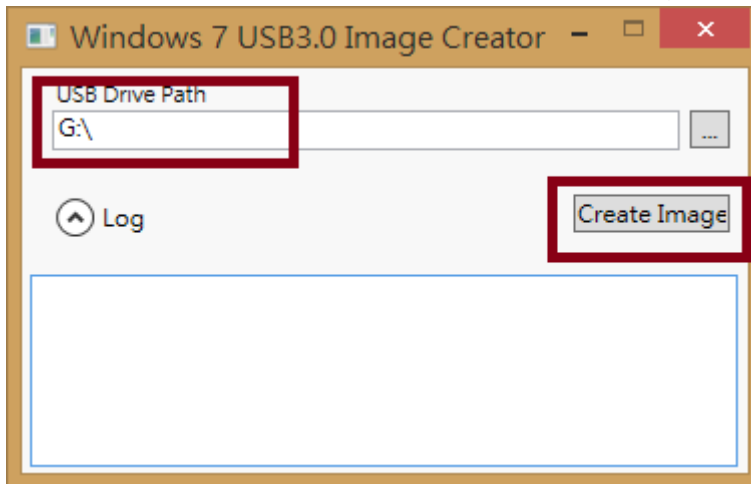

3. Copy the Installer_Creator.exe, USB_drivers folder to the Windows 7/POS Ready 7 USB pen drive.

4. Execute Windows 7 USB 3.0 Creator

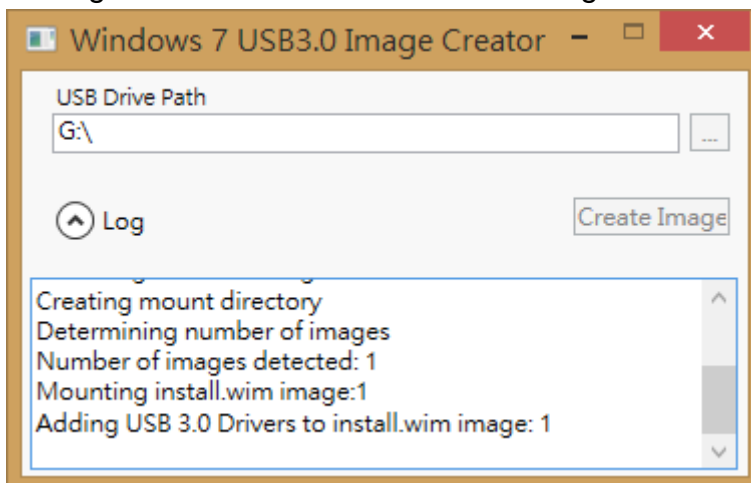

Execute Installer_Creator.exe

Set the USB Drive Path, and click "Create Image" button

Update Finished!

1.5. LAN Driver Installation

1. On the main screen, click “Product Series”.

2. On the welcome screen, click Next.

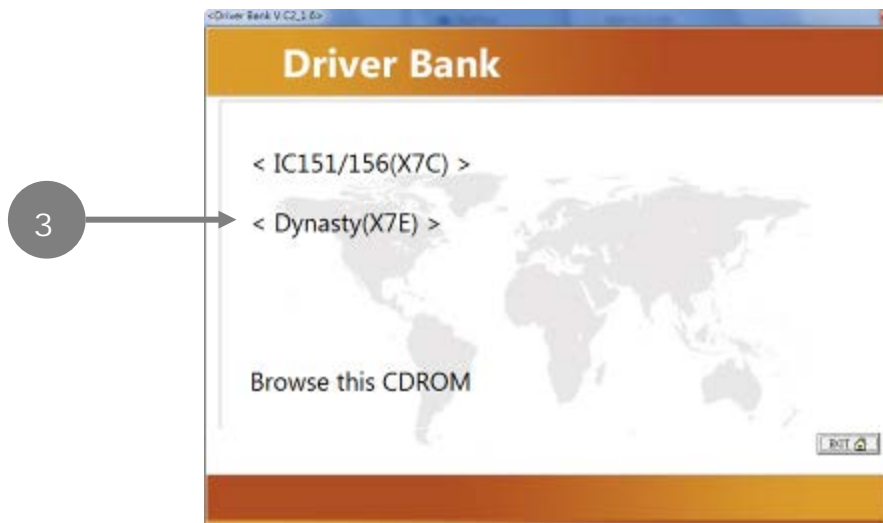

3. Click Install to begin the installation.

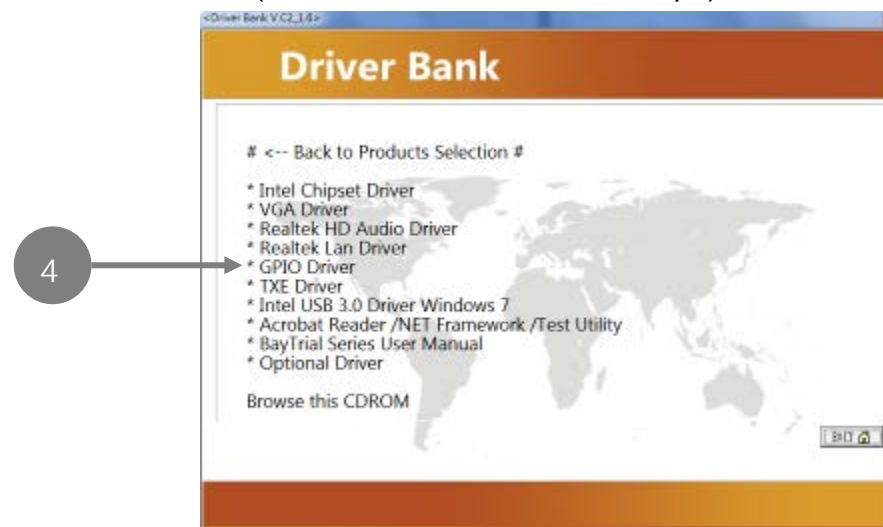

4. Click Finish.

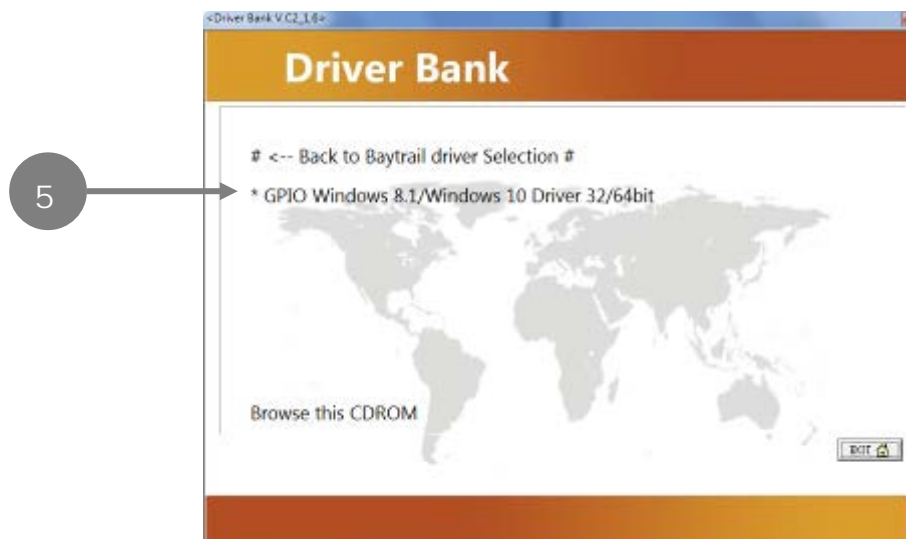

5. On the main screen, click **“Product Series”**.

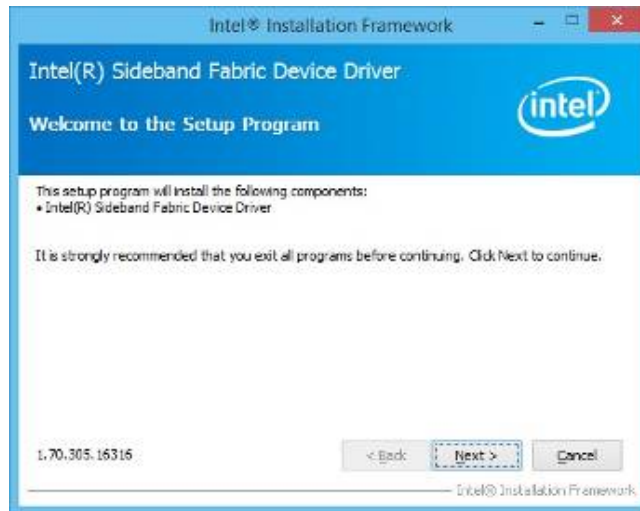

6. Click GPIO Driver. (There are two installation steps)

7. Select for Windows 32 bit or 64 bit.

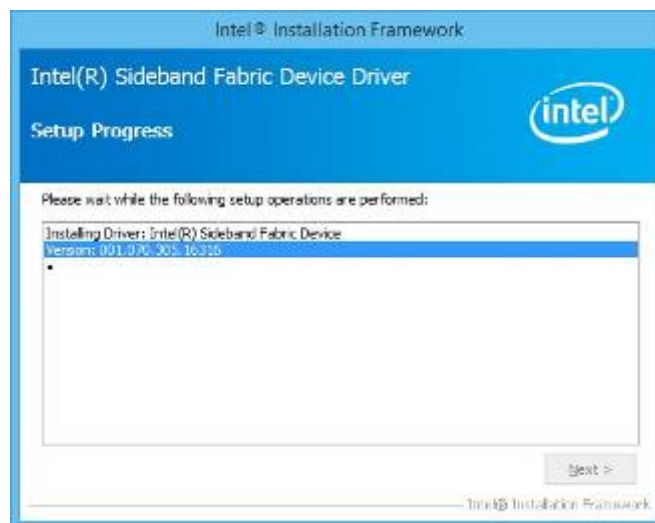

8. Click **Next**.

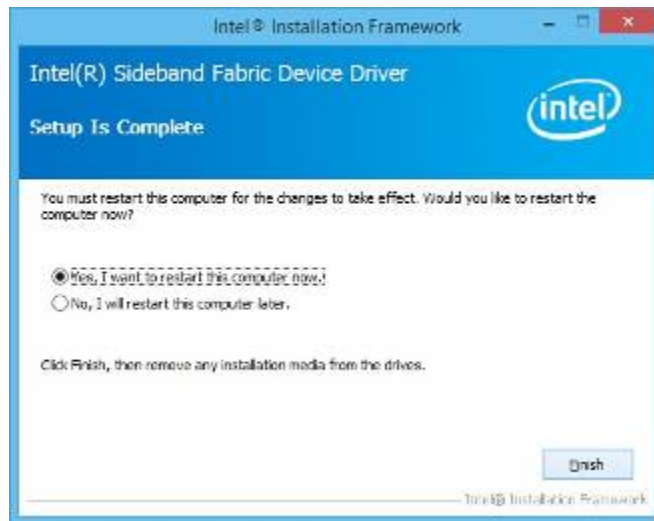

9. Click **Yes**.

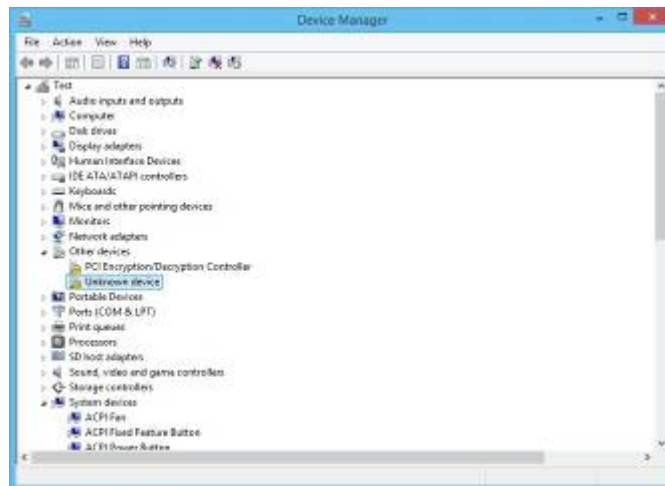

10. Click **Next**

11. Click **Finish**.

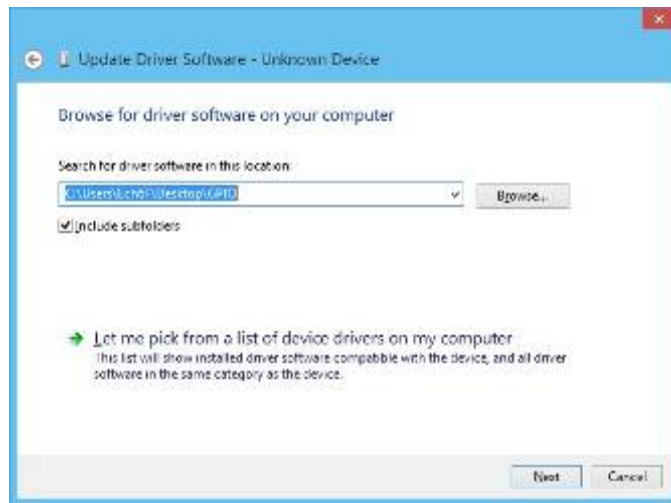

Step1: Open The Device Manager screen, select Unknown device.

Step2: Select Properties

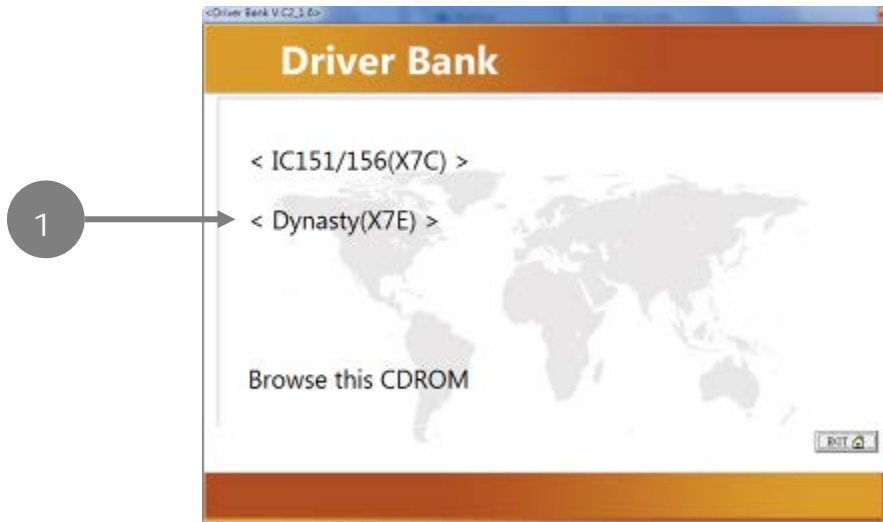

12. Click **Next**

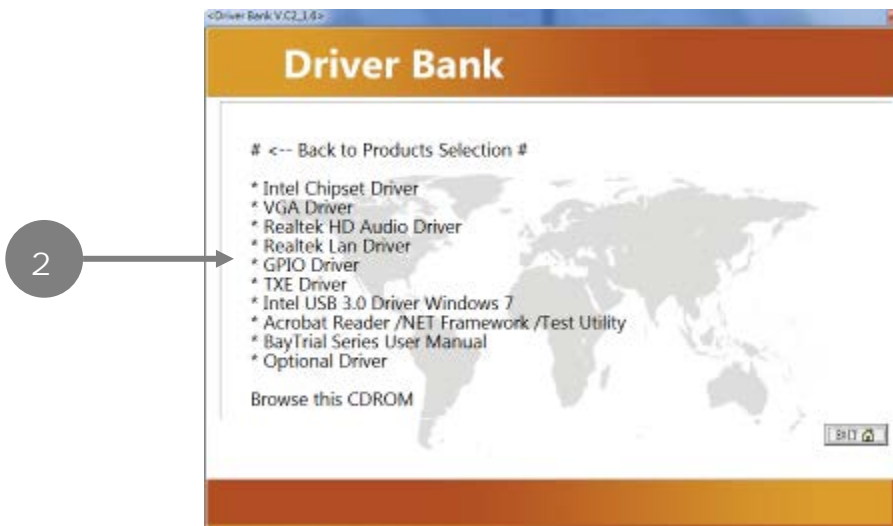

1.6. GPIO Driver Installation for Win 8.1 32bit

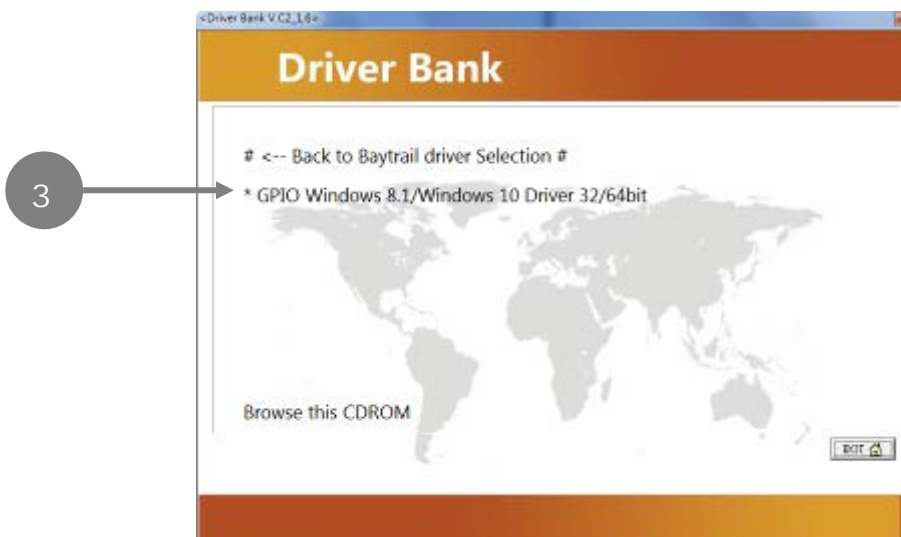

1. On the main screen, click “Product Series”.

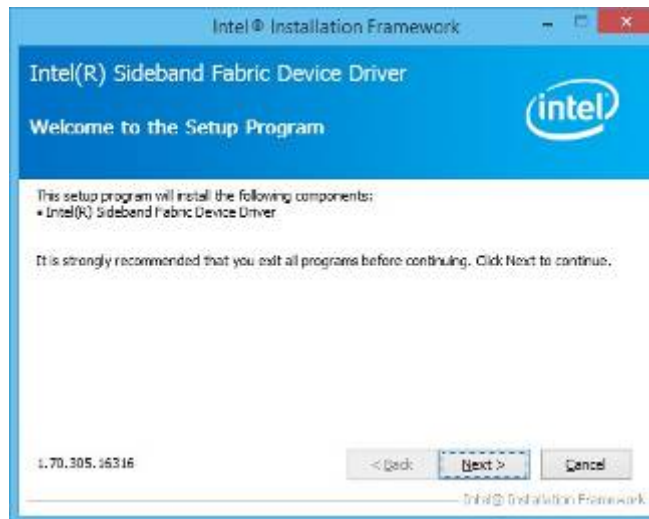

2. Click **GPIO Driver**.

3. Select for GPIO Windows 32 bit or 64 bit.

4. Click **Next**.

5. Click **Yes**.

6. Click **Next**.

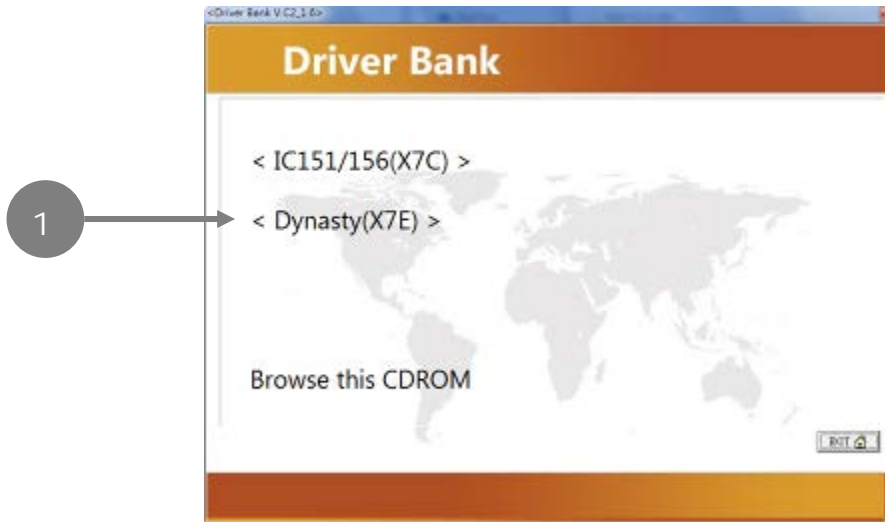

7. Click **Finish**.

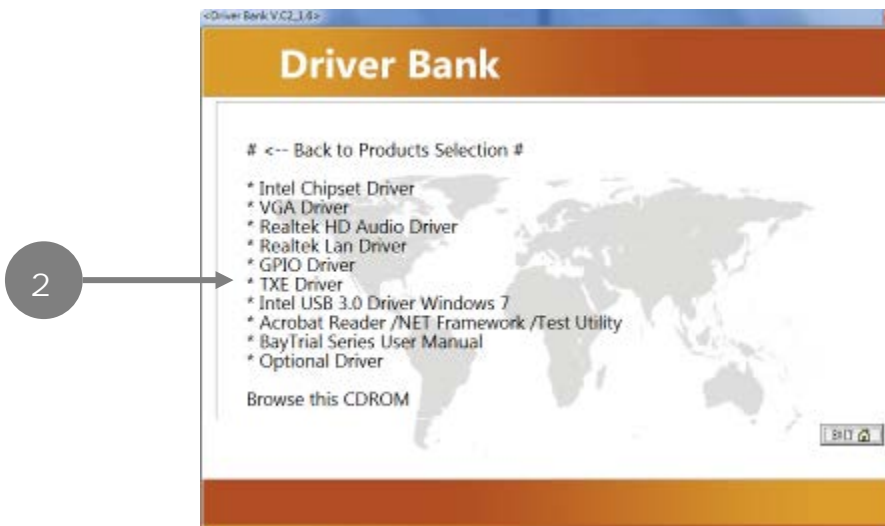

1.7. TXE Driver Installation

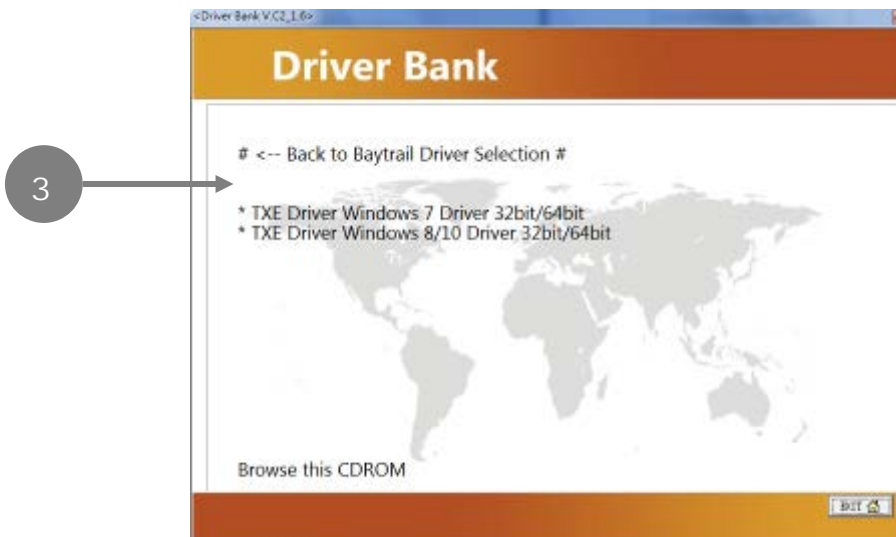

1. On the main screen, click “Product Series”.

2. Click TXE Driver.

3. Select for TXT Driver Windows 32 bit or 64 bit.

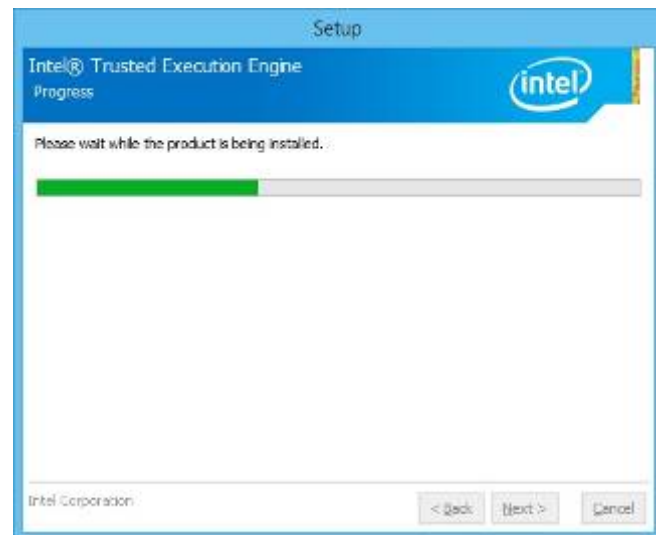

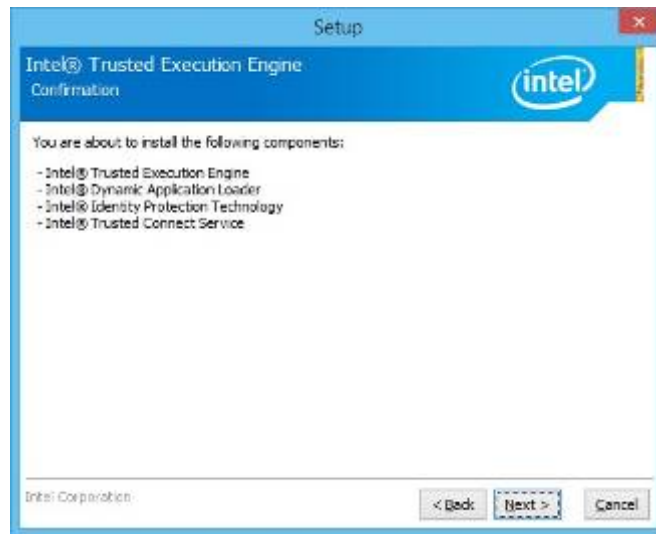

4. Click **Next**.

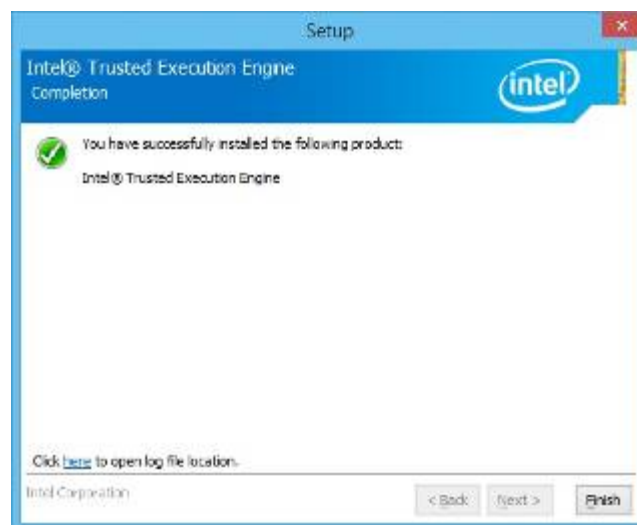

5. Click **Next**.

6. Click **Next** to begin the installation.

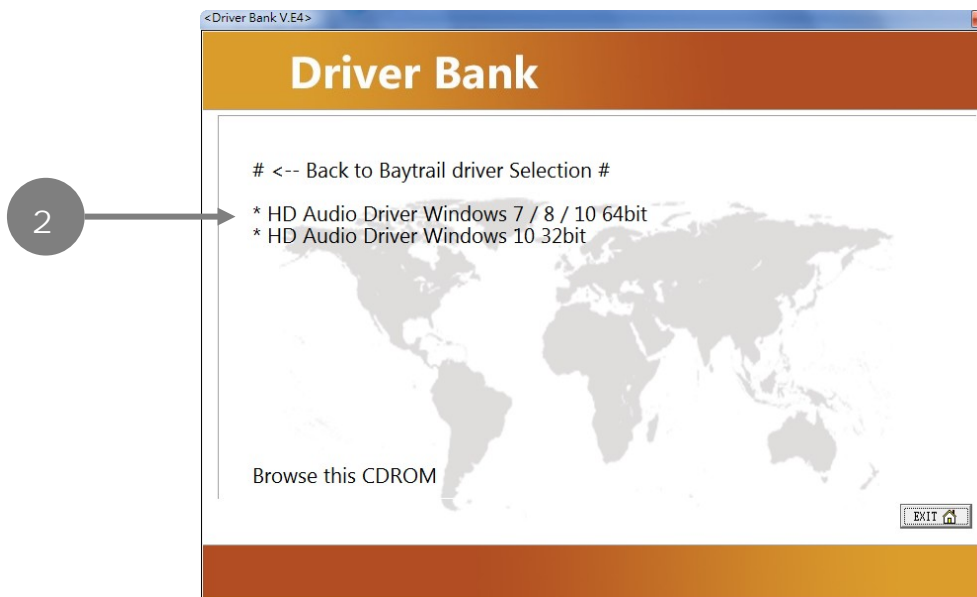

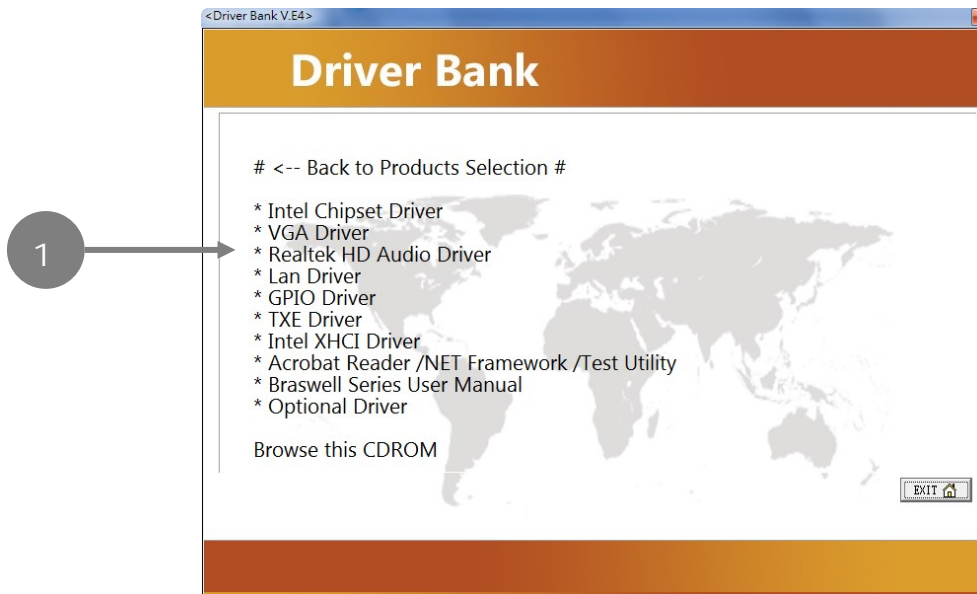

7. Click **Finish**.

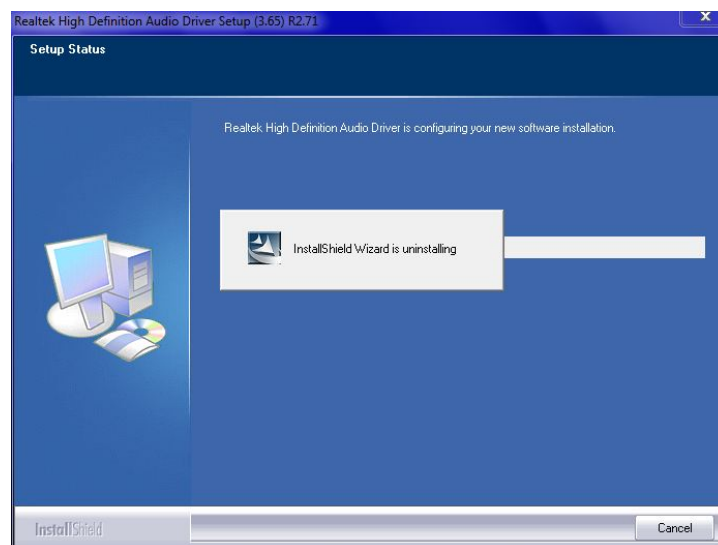

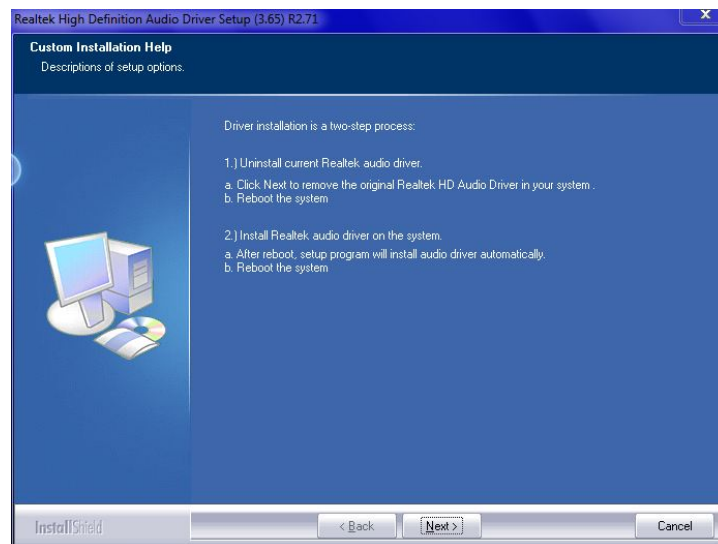

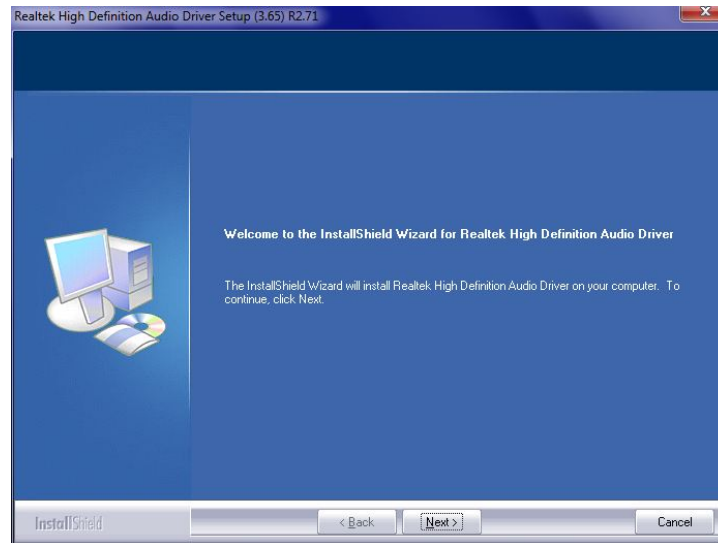

1.8. Audio Driver Installation

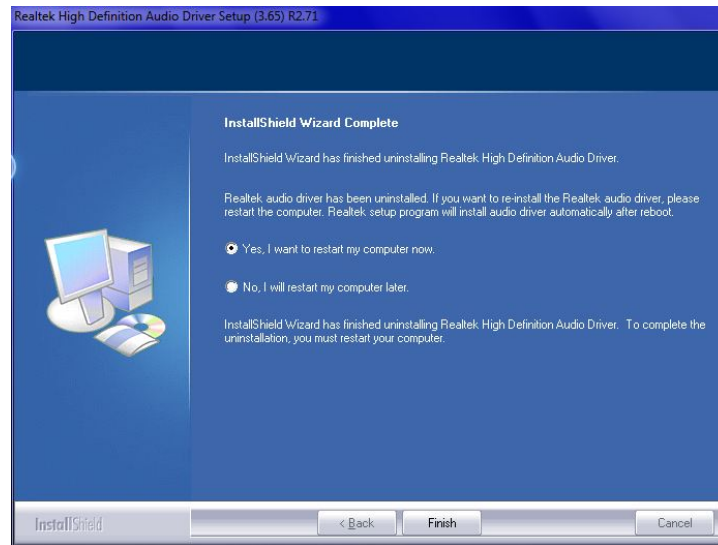

1. Click **Realtek HD Audio Driver**.

2. Click **Next** to begin the installation.

3. Click **Finish**.

TouchKit Utility Quick Guide

2.1. Launch TouchKit Utility

There are two alternatives to launch **TouchKit**.

Option 1:

Under Microsoft Windows 7, click “**start**” menu and select “**Programs**”, under “**TouchKit**” menu, click “**Configure Utility**”.

Option 2:

Click  icon on the task bar to launch **TouchKit** utility.

2.2. General

The **General** tab in **Touchkit utility** shows all of **TouchKit** touchscreen controllers installed as below, including RS232, USB and PS2 interfaces.

Add

The function button is used for serial RS232 controllers only. Press this button to search the **TouchKit** serial controllers connected with the COM ports of the device. Whenever it finds a new **TouchKit** serial controller, a new serial controller icon object will be shown in the controller list window automatically.

USB **TouchKit** device supports plug and play, the icon object for USB controller will be shown in the controller list window automatically when the USB controller is connected with the USB port of the device. And, the icon object for the USB controller will disappear automatically as soon as the device was removed from the USB port of the device.

TouchKit PS2 driver support PS2 mouse and **TouchKit** touchscreen controller. It can works with both PS2 mouse and **TouchKit** touchscreen PS2 controller. After the **TouchKit** PS2 driver was installed, this utility assumes the PS2 touchscreen controller exists and is always shown in the controller list window.

Remove

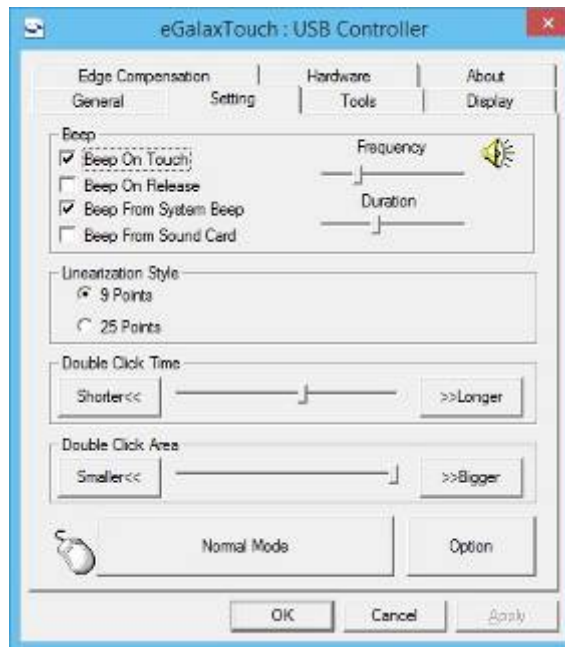

This function button is used for serial RS232 controllers only. This button will be grayed and disabled automatically when the selected controller in the controller list window is not RS232 type. Press to remove and uninstall the selected serial RS232 controller from the device. Then, this serial RS232 icon object in controller list window disappears automatically.

USB TouchKit device supports plug and play, the icon object for USB controller will be shown in the controller list window automatically when the USB controller is connected with the USB port of the device. And, the icon object for the USB controller will disappear automatically as soon as the device was removed from the system USB port.

TouchKit utility does not allow you to remove/uninstall the PS2 device driver dynamically. To uninstall the **TouchKit** PS2 driver, You needs to go to Windows Device Manager to do un-installation. In addition, after PS2 un-installation, it needs to reboot the device to complete un-installation.

2.3. Settings

There are function buttons and check boxes in the **Settings** tab.

Beep

Beep On Touch

Check this check box to enable driver to generate a beep sound when touch touchscreen state is switched from untouched to touched state.

Beep On Release

Check this check box to enable driver to generate a beep sound when touchscreen state is switched from touched state to untouched state.

Frequency

Drag the slider to adjust this frequency to control the beep sound frequency generated by the driver.

Duration

Drag the slider to adjust this duration to control the beep sound duration.

Linearization Style

TouchKit utility provides you with both 9 points and 25 points calibration for linearization. You can select the suitable linearization type.

Double Click Time

Double Click Time is used to set double click time. Change this value will affects the double click behavior for all of the mouse devices connected to the device. Two continuous clicks at the same area within this specified time period will be recognized as a double click event.

Double Click Area

Double click area is used to set the double click area. Change this value will affects the double click behavior for all of the mouse devices connected to the device. Two continuous clicks with this specified area in the specified double click time will be recognized as a double click event.

Mouse Emulation Mode

Change the emulation mode by pressing on this button.

Normal Mode

Normal mode behaves mouse button down and mouse move. You can select this mode to select object, and dragging the object.

Click On Touch

With this **Click On Touch** mode, the driver emulates a mouse click event when the touchscreen state was switched from un-touched state to

touched state. Then, the driver always generate mouse move event and is tracking the touch position until the touchscreen state switched to un-touch state.

Click On Release

With this **Click On Release** mode, the driver emulates a mouse click event when the touchscreen state was switched from touched state to un-touched state.

Click On Touch without moving cursor

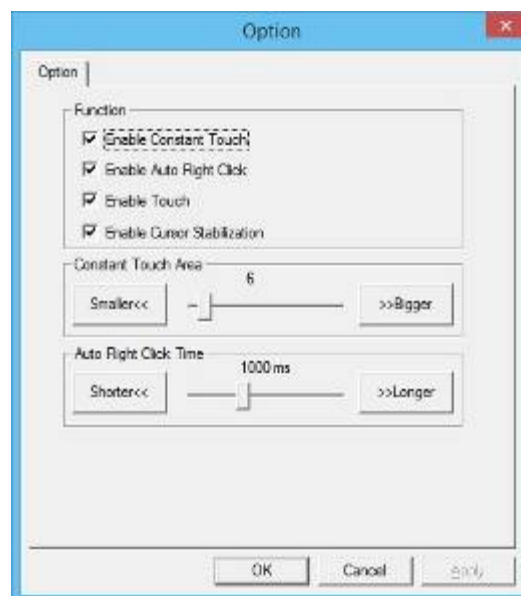

With this mode, the driver behaves similar as **Click On Touch** mode. The cursor does not move to the touch position except the first touch point.

Click On Release without moving cursor

With this mode, the driver behaves similar as **Click On Release** mode. The cursor does not move to the touch position except the lift-off point.

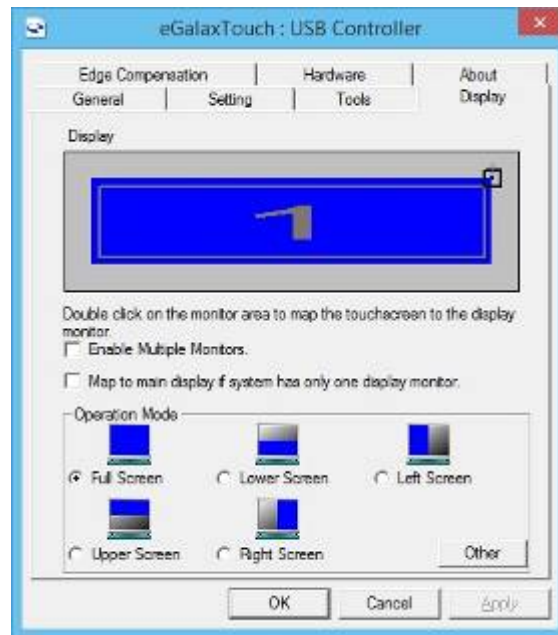

Option

You can set configuration for some advanced functions with this option button. Press this button, a pop up property sheet window will be popped up and shown as below.

2.4. Display

TouchKit driver utility supports multiple monitor and display system. To work with multiple monitor system, you need to do proper configuration to map the touchscreen working area to the correct system display area. You can do such configuration with this property page shown as below,

Please follow below instructions to do the configuration:

Enable multiple monitor

Check this check box to enable multiple monitor support and uncheck it to disable multiple monitor support. When this function is disabled, the touchscreen will be mapped to the primary monitor automatically.

When this function is enabled, user can double click on the monitor area in the monitor geometry window to assign the monitor area where the touchscreen will be mapped. In other word, the touchscreen will work with the selected monitor. Then, the selected monitor area rectangle line will be changed to be white and the other monitor rectangles line will be grey.

Map to main monitor when the system has only one monitor

When the multiple monitor function was enabled, and the system has only one monitor.

Driver allows user to generate the mouse event for the primary monitor or not when the touchscreen which were not mapped to primary monitor. Check the check box to enable this function, then, the driver will generate the mouse event for the primary monitor even through the touchscreen was configured as other monitor mapping and multiple monitor function enabled.

Operation Mode

TouchKit driver support split display mode for those applications which do not map the touchscreen to the full screen of the monitor.

Full screen

The touchscreen will be mapped to the full screen of the specified monitor.

Right screen

The touchscreen will be mapped to the right half screen of the specified monitor.

Left screen

The touchscreen will be mapped to the left half screen of the specified monitor.

Upper screen

The touchscreen will be mapped to the upper half screen of the specified monitor.

Lower screen

The touchscreen will be mapped to the lower half screen of the specified monitor.

Other operation mode

Quarter 1

The touchscreen will be mapped to the first quarter area of the specified monitor display.

Quarter 2

The touchscreen will be mapped to the 2nd quarter area of the specified monitor display.

Quarter 3

The touchscreen will be mapped to the 3rd quarter area of the specified monitor display.

Quarter 4

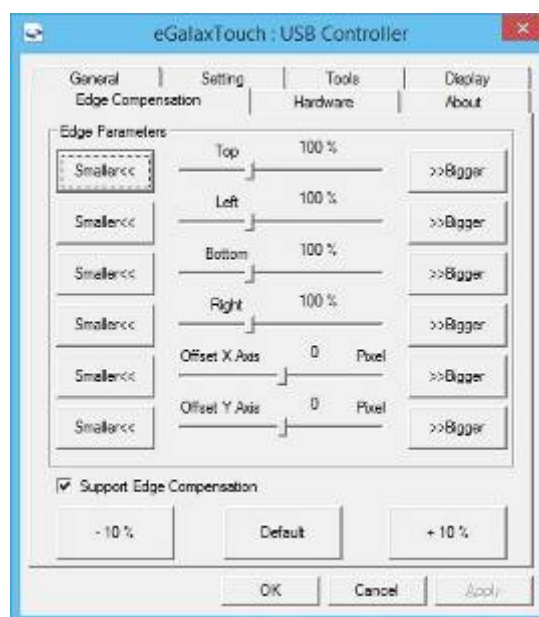

The touchscreen will be mapped to the 4th quarter area of the specified monitor display.

Customized

If the touchscreen needs to be mapped the area other than the above area, user can define the mapping area for application. With this mode, the driver does not correct the mapping area when the display resolution changed. It needs to do configuration setting again whenever the display resolution changed.

2.5. Edge Compensation

Edge Compensation property page contains functions of **Edge Compensation** for Top, Bottom, Left, Right, X Axis and Y Axis.

In some cases, if it is difficult to touch items at the edges of the touch panel, you can set adjustment to reach the edges of the screen image.

Top

If you set the Edge to "Smaller", **TouchKit** will reduce the horizontal position of the top edge. If you set the Edge to "Larger", **TouchKit** will extend the horizontal position of the top edge.

Bottom

If you set the Edge to "Smaller", **TouchKit** will reduce the horizontal position of the bottom edge. If you set the Edge to "Larger", **TouchKit** will extend the horizontal position of the bottom edge.

Left

If you set the Edge to "Smaller", **TouchKit** will reduce the vertical position of the right edge. If you set the Edge to "Larger", **TouchKit** will extend the vertical position of the left edge.

Right

If you set the Edge to "Smaller", **TouchKit** will reduce the vertical position of the right edge. If you set the Edge to "Larger", **TouchKit** will extend the vertical position of the right edge.

In some cases, cursor will be behind the finger when you touch the panel. If you can not see the cursor when you touch down the panel, you can set **X Axis** or **Y Axis** to move the cursor.

Offset X Axis

If you set the Offset X Axis to Smaller, cursor will be moved a pixel of X Axis to left.

If you set the Offset X Axis to Larger, cursor will be moved a pixel of X Axis to right.

Offset Y Axis

If you set the Offset Y Axis to Smaller, cursor will be moved a pixel of Y Axis to top.

If you set the Offset Y Axis to Larger, cursor will be moved a pixel of X Axis to bottom.

Edge Compensation Switch

You can check **Support Edge Compensation** check box to enable/disable this function from left corner.

Edge Compensation Button

Click **+10%** or **-10%** button to adjust the smaller or larger of edge.

If you click **+10%** button, the top, bottom, left and right edges will extend 10% of orientation to touch screen, and cursor will be moved 10 pixel of X and Y Axis to right and top.

If you click **-10%** button, the top, bottom, left and right edges will contract 10% of orientation to touch screen, and cursor will be moved 10 pixel of X and Y Axis to left and bottom.

Click **Default** button to resume to the default value.

2.6. How to Use Event Selector

1. On the desktop of Windows, click  icon.
2.  icon change to .
3. Now the tapping is simulating right mouse button clicking.
4. After one tap on the screen,  icon change to .
5. The tapping resumes to left mouse button clicking.
